

### ***Fast Curing K-Screed Provides for Education Excellence at Texas University***

- Product: K-Screed • Market Sector: Education • Location: Doha, Qatar
- Client: Texas A&M University • Date: 2007

The **high standards** of engineering education at **Texas A&M University** in Doha, Qatar, are reflected throughout the faculty buildings, **right down to the floors**. Flowcrete's **semi-dry cementitious K-Screed** was selected as the substrate for its **quick-drying, fast-curing properties** and **high compressive strength**. Around 50,000 square metres of system were installed in the laboratories, classrooms and corridors, ready to receive the final floor finishes. In the engineering laboratories, the selected floor finish was Flowcrete's **hard-wearing Flowfresh** which provides continuous **anti-microbial protection** against a range of bacteria, fungi and mould. The **no-joints, anti-slip** surface is **hygienic** and **easy to clean** and delivers **superior chemical resistance**.
