

Mondéco Earth at L'Oreal, Belgium

The Project

Cosmetics manufacturing plant.

The Requirement

L'Oreal not only wanted a strong aesthetically pleasing floor but one which was seamless, easy to clean and slip resistant.

The Solution

5,000 square metres of Mondéco Earth. Mondéco seamless terrazzo flooring contains granite and flint, combining the beauty of nature with incredible strength and longevity. It has high chemical resistance and is easy to clean and maintain. The floor was installed to a schedule designed to cause minimum disruption to production at the plant.
